

SUPPORT ESCALATIONS DIGEST — June 2026

Volume: 41 escalations (down from 58 in May). Top categories: billing (14), auth/SSO (9), performance (8), data export (6), other (4).

Billing: most tickets trace to promo code stacking edge cases; the promo code engine v2 flag fixes stacking rules. Refund workflows handled 22 refunds within SLA; two chargebacks disputed successfully.

Auth: three enterprise tenants hit the Okta SSO group-mapping bug fixed in sso-okta-setup rev 12. MFA reset requests remain the top self-serve gap.

Performance: two customers on the legacy API reported p99 spikes matching the API rate limiting rollout; allowlisted while they migrate to cursor pagination per the API style guide.

Escalation path reminder: SEV assessments per incident-severity doc; customer comms templates live in the incident runbook appendix.
