

Engineering OKRs — Q3 2026

Objective 1: Billing customers can trust every invoice

KR1: invoice processing median under one day (from 0.8 days, hold under load). KR2: billing alerts caused by double-charges to zero. KR3: chargeback handling fully automated for amounts under \$500.

Objective 2: The platform survives failure gracefully

KR1: regional failover game day completes within the one-hour RTO. KR2: canary deployments cover 100% of stateless services. KR3: rollback strategies documented and drilled for the top ten services.

Objective 3: Developers ship faster

KR1: CI median under eight minutes via build caching. KR2: fast-track RFC lane adopted for half of small proposals. KR3: local dev env cold start under ten minutes on a new laptop.
