

PRODUCTION MIGRATION CHECKLIST (print and check off)

Before:

- ☐ Migration reviewed against schema-migrations guide (no table rewrites)
- ☐ Migration linter green (no bypass flags — see the May post-mortem)
- ☐ Rollback script tested in staging
- ☐ Database backups verified within the last 7 days
- ☐ Replication lag under 1s on all replicas
- ☐ Change announced in the deploy channel with the deploy guide link

During:

- ☐ Run inside the maintenance window; watch lock time in Grafana
- ☐ PgBouncer pool sizes reduced per the connection pooling runbook
- ☐ Abort if lock wait exceeds 30 seconds

After:

- ☐ Prometheus alerts quiet for 30 minutes
- ☐ Autovacuum/analyze completed on touched tables (postgres vacuuming doc)
- ☐ Update the schema registry and notify the data team
- ☐ Log the change in audit logging for SOC 2 evidence
