

Vendor Contract Summary — 2026 Renewals

Overview

Twelve vendor contracts renew in H2 2026. Total annualized spend is \$2.4M, up 9% year over year, driven by observability volume growth and the Salesforce seat expansion.

Key renewals

Datadog: tracing volume renegotiated with a 20% committed-use discount. Stripe: processing tier unchanged; chargeback handling add-on trialed. PagerDuty: consolidated to one account for the oncall rotation. Okta: SSO seats plus the workforce MFA bundle. AWS: enterprise discount program renewal aligned with the cloud cost analysis.

Risks

The ClickHouse analytics vendor is a single point for product metrics; a self-hosted fallback is costed in the capacity planning notes. Legal flagged data retention policy alignment for two data processors under GDPR.
