

VENDOR SECURITY REVIEW NOTES — ClickHouse Cloud, June 2026

Reviewed by: security team, per the vendor contract summary process.

Posture: SOC 2 Type II current (report on file); ISO 27001 certified;
pen test summary shared under NDA — no criticals, two mediums remediated.

Data handling: product analytics events only (no payment data). Data
classification: Internal. Retention aligned to our 13-month data retention
policy via TTL tables. Deletion API verified against a GDPR erasure request.

Access: SSO via Okta enforced; no local accounts. API keys rotate 90 days
via secrets management. Audit logging exports to our SIEM nightly.

Network: private link only from the VPC; no public endpoints. Egress covered
by the NAT gateway allowlist.

Verdict: APPROVED for Internal-classified data through the 2027 renewal.
Follow-up: re-review if tenant isolation model changes for multi-region.
